PROFESSIONAL SUMMARY

- Software developer with nearly 5 years of experience supporting production web platforms, CMS migrations, workflow automation, documentation, and enterprise campaign delivery.
- Cybersecurity graduate with CompTIA CySA+, PenTest+, and ISC2 CC, with hands-on AWS security labs covering access control, logging, alerting, monitoring, and least privilege.
- Background aligns with cybersecurity analysis, security operations, cloud security monitoring, vulnerability management, and defense-sector security controls.

CERTIFICATIONS

CompTIA CySA+, CompTIA Pentest+, ISC2 Certified in Cybersecurity (CC)

SKILLS

Security Analysis: Log analysis, alert triage, vulnerability management, incident response lifecycle, security documentation, NIST SP 800-53 concepts, RMF concepts

Cloud Security: AWS IAM, S3, KMS, CloudTrail, CloudWatch, VPC, Systems Manager Session Manager, encryption, least privilege, access control

Application & Web Security: OWASP Top 10, Burp Suite, secure SDLC, REST API security, vulnerability validation, authentication/authorization

Tools & Development: Python, JavaScript, TypeScript, SQL, HTML/CSS, React, Node.js, Linux, Git/GitHub, OpenVAS, Kali Linux, AEM, Drupal, Adobe Target

SECURITY PROJECTS

AWS Cloud Security Monitoring and Detection Lab

- Built a private AWS security lab using VPC, EC2, Systems Manager Session Manager, S3, KMS, IAM, CloudTrail, and CloudWatch.
- Configured least-privilege access for encrypted S3 log storage using IAM policies, KMS key policies, and encryption-context conditions.
- Created CloudTrail data-event logging, CloudWatch metric filters, and alarms to detect simulated S3 data-exfiltration patterns.
- Validated security controls through access-denial testing, encryption failure testing, logging review, and alert threshold tuning.

EXPERIENCE

Robert Half — San Ramon (Remote), CA

September 2021 — Present

Software Developer, Frontend Web

- Maintained 17 global production websites across multilingual regions, supporting availability, reliability, and enterprise campaign delivery.
- Supported AEM and Drupal CMS migration activities, improving configuration accuracy and reducing platform operational risk.
- Automated repeatable AEM campaign workflows using platform tooling, improving team productivity by approximately 20% and reducing manual configuration errors.
- Implemented Adobe Target personalization and analytics with privacy-aware tracking, consent considerations, and controlled data collection.

Opal, LLC — Menlo Park (Remote), CA

May 2022 — August 2022

Software Engineer, Full Stack Engineer — Part-Time Contract

- Supported full-stack development using React and Express, contributing to feature implementation, defect resolution, and application stability.
- Designed reward-filtering logic by reward type and frequency, while documenting onboarding guidance for new developers.

University of California, Davis — Shared Services Organization (SSO) — Davis, CA

January 2020 — July 2021

Web Developer Intern

- Maintained Drupal-based web content and developed reusable HTML, CSS, and JavaScript templates for university web pages.
- Analyzed user interaction patterns and collaborated cross-functionally to improve usability, content structure, and accessibility.

EDUCATION

Western Governors University — M.S. Cybersecurity and Information Assurance

December 2025

University of California, Davis — B.S. Computer Science and Engineering

June 2021
